

CAMELLIA SASANQUAS

As camellias go, this specie is very hardy. Reports as to just how hardy are conflicting but it is our opinion that they may be grown in Zones I, II and III.

Sasanquas are not suitable for corsage work or cutting. They are hardier and freer blooming than the Camellia Japonicas and we recommend them for landscape use.

Sasanquas make an excellent informal hedge. They may be cut back in the spring but they should not be kept clipped since this will interfere with their bloom. For use as a hedge in Zone I and II we recommend Cleopatra or Snow on the Mountain since they are the most compact. In Zone III Rosea would be preferable since it is somewhat hardier. These are bed grown Sasanquas which were about 3 feet tall, but which were cut back to about 18". They have branched nicely and are now over 18".

Note Our Special Offer: 20 Mixed For \$5.00

CLEOPATRA	Cherry red, single. Very compact growth. Dark green foliage.
SNOW ON THE MOUNTAIN	Semi-double white. Very profuse, our favorite.
ROSEA	Large single flowers of brilliant pink.
MIXED	A mixture of 5 varieties

CAMELLIA JAPONICAS

Where they can be grown, the Camellia Japonica is generally considered the most desirable specie of camellia. The blooms are very satisfactory for cutting and corsages.

All the Camellia Japonicas listed below are 12" to 18" tall. We have found from experience that this size transplants best and in the long run is your best buy.

ALBA PLENA:	Full double formal flat white. Very beautiful but not very hardy.
BRILLIANT:	Red - Same form as pink perfection but slightly larger
HERME:	Bell shaped semi-double pink and white variegated, very unusual and exceedingly beautiful but rather difficult to grow.
MATHOTIANA:	(Purple Dawn): Our most popular variety, very large pink bloom shading to purple at the edges. Opens with a rose bud center during most of the season but late in the year sometimes show stamens.
MATHOTIANA VARIEGATED:	Same as above but bloom splashed with white.
PINK PERFECTION:	Full double delicate shade of shell pink, flat bloom. Very profuse.
PROFESSOR SARGENT:	Ball shaped dark red bloom. The easiest to grow and the hardiest camellia japonica that we know.
VICTOR EMANUEL:	Late blooming, ball shaped dark red.

GENERAL INFORMATION

It will speed up the handling of your order considerably if you will use the order blank provided.

Our Shipping Department is closed from December 1 to January 4.

Dutch Iris bulbs will not be available after December 1st.

Other stock will be available in the spring if our supply holds out.

All bulb prices are delivered prices. There is no postage or handling charge on bulb orders.

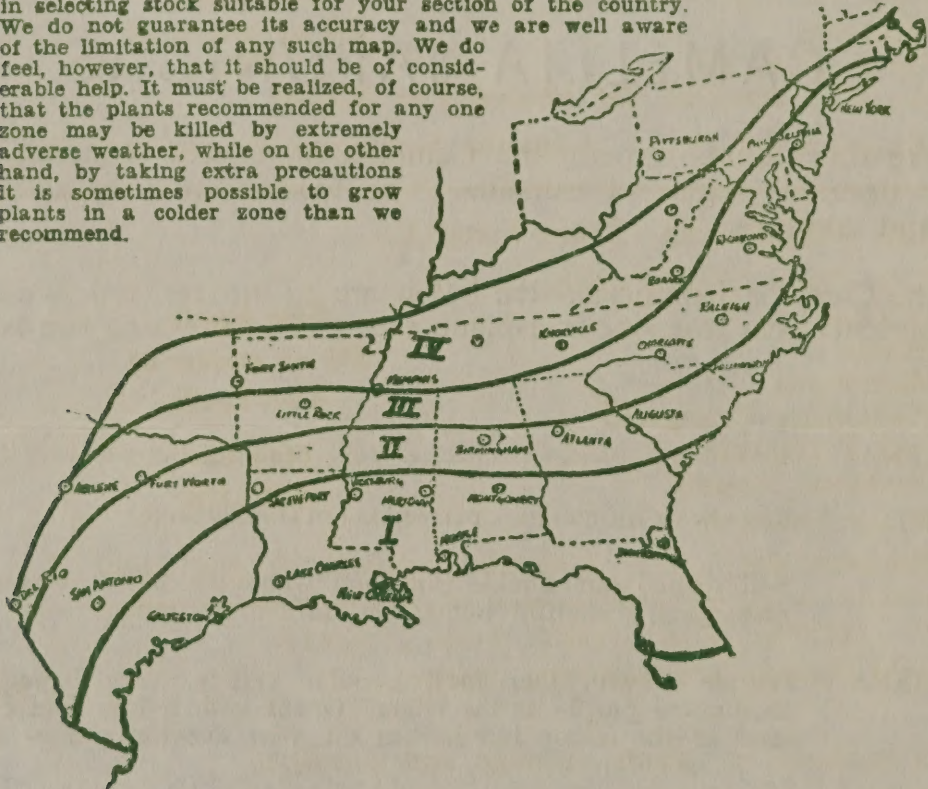

On orders for plants, there is a flat charge of \$1.00 to partially offset the cost of packaging and postage. This is a flat charge and is independent of the size of the order.

Remittances may be made by cash, check or money order. Because mail in our printed self-addressed envelope is almost never lost we recommend cash for your convenience if your order is small. We will make good cash (not over \$3.00) lost in the mail if the order was mailed in our regular return addressed envelope.

OUR LIBERAL THREE-WAY GUARANTEE

- I. ALL OUR STOCK IS GUARANTEED TO ARRIVE IN GOOD CONDITION. We unconditionally guarantee all stock will arrive in good condition. Any of our stock may be returned within 7 days for full refund including return postage. All of our bulbs are guaranteed to sprout and any which do not may be returned for full refund.
- II. ALL OUR STOCK IS GUARANTEED TO GROW. Any stock which dies within one year for any cause whatsoever will be replaced at half price. Any complaints under the terms of Section II of our guarantee should state the kind and number of plants which die and should include 50% of the original cost.
- III. CERTAIN STOCK IS GUARANTEED TO BLOOM. This guarantee varies with the item.

This map is an attempt to divide the eastern section of the United States into climate zones to aid you in selecting stock suitable for your section of the country. We do not guarantee its accuracy and we are well aware of the limitation of any such map. We do feel, however, that it should be of considerable help. It must be realized, of course, that the plants recommended for any one zone may be killed by extremely adverse weather, while on the other hand, by taking extra precautions it is sometimes possible to grow plants in a colder zone than we recommend.

We never substitute when it is avoidable but we are occasionally sold out of
an item which is ordered. If we are unable to fill your order exactly as it
is written we will make the best substitution possible unless you instruct us
otherwise. Satisfaction is guaranteed of course. If you prefer that we send
you a refund instead of substituting check here ☐. If you have any special
instructions on substitution, please specify.

AZALEAS

For massed display of brilliant color the azalea is unexcelled by any other shrub. Azaleas are easy to grow if you are careful to select varieties hardy for your climate and if you plant them in acid soil.

Our map on the reverse side is designed to aid you in selecting the best varieties for your location. Soil in most of the East and Southeast is already acid but if your local soil happens to contain too much lime this can be easily counteracted by the use of an acid fertilizer.

The Azaleas offered this fall are plants left over from last spring. They have been kept cut back, so they are unusually heavily branched and exceptionally well rooted. The Giant Azaleas for the most part will be 8" to 10" high, whereas Dwarf Azaleas are about 6" tall. Plants will have a few scattered blooms next spring but will not bloom heavily until the spring of 1957.

GIANT (Zones I & II)

FIELDERS WHITE	The best giant white.
FORMOSA	Purple. Very drought resistant. Compact attractive dark green foliage
MOSS POINT ROSE	A lovely shade of rose. Attractive foliage.
PRIDE OF MOBILE	Watermelon red. Our most popular azalea.
SOUTHERN CHARM	Similar to Pride of Mobile, but more drought resistant and darker green foliage. Bloom is a little larger with a slight purple cast.

DWARF AZALEAS

SNOW	White, double (hardy)	{ ZONES I, II III
CHRISTMAS CHEER	Red, upright (hardy)	
HINODEGIRI	Red, compact (very hardy)	
		All Zones

GARDENIAS

We offer nicely branched 18" to 24" Gardenias for 35¢ each or 10 for \$2.50. These plants are of the so-called "ever blooming type". However, they usually bloom heavily only in spring and fall. We recommend them for Zones I, II and parts of III only.
